16:00 Research presentation

Thailand 14:00 / Perth 15:00

Prof. Martha LUDWIG

Head of School (School of Molecular Sciences)
The University of Western Australia

The genus *Neurachne*: Key to Understanding
the Evolution of C₄ Photosynthesis

17:00 Information Session on the Joint PhD program

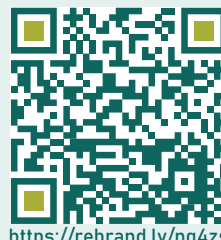

About the Joint PhD Program

The Graduate School of Bioagricultural Sciences currently has two Joint PhD Programs, which allow students to obtain a PhD degree, issued by both Nagoya and our partner universities. The students will spend time in both countries, with unique opportunities for joint research and cultural exchange.

The International Collaborative Program in Agricultural Sciences between Nagoya University and Kasetsart University, was established in 2017. KU is Thailand's oldest agricultural university and one of the largest universities in the country. It offers a wide range of research topics in life science, with a particular strongpoint in agriculture.
