Department of Horticulture, Faculty of Agriculture at Kamphaengsaen
Kasetsart University, Kamphaengsaen Campus

Digging deeper for better understanding
of chilling injury in pineapple fruit

17:00 Information Session on the Joint PhD program

About the Joint PhD Program

The Graduate School of Bioagricultural Sciences currently has two Joint PhD Programs, which allow students to obtain a PhD degree, issued by both Nagoya and our partner universities. The students will spend time in both countries, with unique opportunities for joint research and cultural exchange.

The International Collaborative Program in Agricultural Sciences between Nagoya University and Kasetsart University, was established in 2017. KU is Thailand's oldest agricultural university and one of the largest universities in the country. It offers a wide range of research topics in life science, with a particular strongpoint in agriculture.

The International Collaborative Program in Agricultural Sciences between Nagoya University and The University of Western Australia was established in 2018. The UWA is among the top 100 universities in the world and offers a wide range of research activities, as well as an extensive selection of student activities.
