15:00 Research presentation

Thailand 13:00 / Perth 14:00

Professor Kadambot Siddique

Hackett Professor of Agriculture Chair and Director
Institute of Agriculture, The University of Western Australia

Role of transpiration in regulating leaf
temperature in wheat: Physiological
basis of contrasting genotypic responses

16:00 Information Session on the Joint PhD program

About the Joint PhD Program

The Graduate School of Bioagricultural Sciences currently has two Joint PhD Programs, which allow students to obtain a PhD degree, issued by both Nagoya and our partner universities. The students will spend time in both countries, with unique opportunities for joint research and cultural exchange.

The International Collaborative Program in Agricultural Sciences between Nagoya University and Kasetsart University, was established in 2017. KU is Thailand's oldest agricultural university and one of the largest universities in the country. It offers a wide range of research topics in life science, with a particular strongpoint in agriculture.
